

## 2-Year Weekly Plan: Mastering DSA and Development

This roadmap is tailored for a 5th-semester B.Tech CSE AI student aiming to excel in DSA, development, and internships while preparing for an impressive portfolio and competitive coding.

### Year 1: DSA Foundation and Development Basics

#### Months 1-3: Core DSA Foundations (Arrays, Strings, Linked Lists, Stacks, Queues)

Week Focus	Description	Resources
1-2 Arrays & Strings	Learn operations like sorting, searching, and manipulation.	GeeksforGeeks, LeetCode, Neetcode.io
3-4 Linked Lists	Single, doubly, and circular linked lists.	CodeChef, YouTube
5-6 Stacks & Queues	Implementation and problem-solving.	freeCodeCamp, HackerRank
7-8 Recap & Revision	Solve problems and revise key concepts.	Practice platforms: LeetCode, Codeforces
9-10 Mock Contests	Speed practice with mock coding challenges.	Codeforces, AtCoder

#### Months 4-5: Intermediate DSA (Recursion, Trees, Hashing)

Week Focus	Description	Resources
11-12 Recursion	Basic to advanced recursion and backtracking problems.	LeetCode, GeeksforGeeks
13-14 Trees	Binary trees, BSTs, and tree traversals.	Abdul Bari YouTube, freeCodeCamp
15-16 Hashing	Learn hashing, hash maps, and problem applications.	HackerRank, CodeChef
17-18 Problem Solving	Combine recursion, trees, and hashing in problems.	LeetCode, AtCoder

#### Months 6-8: Advanced DSA (Heaps, Graphs, DP)

Week Focus	Description	Resources
19-20 Heaps	Priority queues, heap operations, and applications.	Abdul Bari YouTube, HackerRank
21-24 Graphs	BFS, DFS, shortest paths, and topological sorting.	GeeksforGeeks, Codeforces

Week Focus	Description	Resources
25-28 Dynamic Programming	Basic DP patterns like Knapsack, Fibonacci.	Striver's DP Series, LeetCode
<b>Months 9-12: Introduction to Development</b>		
Week Focus	Description	Resources
29-32 Frontend Basics	Learn HTML, CSS, and JavaScript fundamentals.	freeCodeCamp, Codecademy
33-34 Backend Basics	Introduction to Node.js or Flask for API development.	YouTube, freeCodeCamp
35-36 Mini Project	Build a simple web project (e.g., blog, to-do app).	GitHub, Netlify
37-38 Machine Learning	Learn Python basics for ML (NumPy, Pandas, Matplotlib).	Coursera, Kaggle
39-40 ML Mini Project	Build an ML project (e.g., spam classifier).	Kaggle, GitHub

## Year 2: Specialization, Advanced DSA, and Career Prep

### Months 1-3: Specialization (Pick One: AI/ML, Web, Mobile)

Week Focus	Description	Resources
41-44 Deep Dive	Learn advanced concepts in your specialization area.	Udemy, Coursera, Documentation
45-48 Advanced Project	Build a significant project showcasing your skills.	GitHub

### Months 4-5: Competitive Programming

Week Focus	Description	Resources
49-52 Problem Solving	Practice advanced DSA problems.	Codeforces, AtCoder, HackerRank
53-54 Mock Contests	Participate in contests for optimization skills.	Codeforces, TopCoder

### Months 6-9: Portfolio Building and Hackathon Preparation

Week Focus	Description	Resources
55-56 Portfolio	Build a personal website showcasing projects.	GitHub Pages, Medium

Week Focus	Description	Resources
57-60 Hackathons	Join hackathons, learn teamwork and rapid prototyping.	Devpost, MLH
<b>Months 10-12: Internship Applications</b>		
Week Focus	Description	Resources
61-64 Resume Building	Tailor your resume for internships and job applications.	LinkedIn, Glassdoor
65-68 Mock Interviews	Practice DSA + development interviews.	Pramp, InterviewBit

### Key Milestones

- **6 Months:** Strong foundation in DSA and basic projects.
- **1 Year:** Advanced DSA and entry-level development skills.
- **1.5 Years:** Specialization and a major project.
- **2 Years:** Internship-ready, with hackathon and competitive coding experience.

## Detailed Weekly Roadmap for Full-Stack Development (6 Months)

Week	Focus Area	Goals and Skills	Resources/Tasks/Projects
1	<b>HTML, CSS, and DOM</b>	<ul style="list-style-type: none"><li>- Understand HTML structure, forms, and semantics.</li><li>- Learn CSS basics and responsive design.</li><li>- Explore the DOM and JavaScript integration.</li></ul>	<ul style="list-style-type: none"><li>- Build a static webpage.</li><li>- Add interactivity with DOM manipulation.</li></ul>
2	<b>JavaScript Basics</b>	<ul style="list-style-type: none"><li>- Master variables, loops, functions, and arrays.</li><li>- Explore ES6 features like let, const, and arrow functions.</li></ul>	<ul style="list-style-type: none"><li>- Create a to-do list app.</li><li>- <a href="#">MDN Web Docs</a></li></ul>
3	<b>Node.js Basics</b>	<ul style="list-style-type: none"><li>- Understand the JavaScript runtime environment.</li><li>- Write HTTP servers.</li><li>- Explore Node.js vs other runtimes (e.g., Bun, Cloudflare).</li></ul>	<ul style="list-style-type: none"><li>- Build a simple Node.js server.</li><li>- Compare runtimes.</li></ul>
4	<b>HTTP Servers &amp; Express</b>	<ul style="list-style-type: none"><li>- Learn HTTP basics, request-response cycle.</li><li>- Create REST APIs using Node.js and Express.</li></ul>	<ul style="list-style-type: none"><li>- Build a REST API for a blog platform.</li></ul>
5	<b>NoSQL Databases (MongoDB)</b>	<ul style="list-style-type: none"><li>- Understand NoSQL concepts.</li><li>- Perform CRUD operations with MongoDB.</li><li>- Explore schema design and indexing.</li></ul>	<ul style="list-style-type: none"><li>- Build a database for a "Bookshelf App" using MongoDB.</li></ul>
6	<b>SQL Basics</b>	<ul style="list-style-type: none"><li>- Learn SQL syntax.</li><li>- Perform CRUD operations with SQL databases (e.g., MySQL or PostgreSQL).</li></ul>	<ul style="list-style-type: none"><li>- Build a simple database for user data.</li></ul>

Week	Focus Area	Goals and Skills	Resources/Tasks/Projects
7	<b>ORMs (Sequelize/Mongoose)</b>	<ul style="list-style-type: none"> <li>- Learn about Object-Relational Mapping.</li> <li>- Use Sequelize for SQL and Mongoose for MongoDB.</li> <li>- Understand model relationships.</li> </ul>	<ul style="list-style-type: none"> <li>- Build a project that integrates Sequelize or Mongoose.</li> </ul>
8	<b>React Basics</b>	<ul style="list-style-type: none"> <li>- Learn React fundamentals: JSX, components, props, and state.</li> <li>- Use React Developer Tools.</li> </ul>	<ul style="list-style-type: none"> <li>- Build a task tracker app.</li> </ul>
9	<b>Styling React Apps</b>	<ul style="list-style-type: none"> <li>- Style React apps using Tailwind CSS or styled-components.</li> <li>- Learn responsive design in React.</li> </ul>	<ul style="list-style-type: none"> <li>- Restyle your task tracker app.</li> <li>- <a href="#">Tailwind CSS Docs</a></li> </ul>
10	<b>TypeScript Basics</b>	<ul style="list-style-type: none"> <li>- Learn TypeScript syntax and static typing.</li> <li>- Integrate TypeScript with React.</li> <li>- Explore type declarations for APIs and models.</li> </ul>	<ul style="list-style-type: none"> <li>- Refactor the task tracker app to TypeScript.</li> </ul>
11	<b>Next.js Basics</b>	<ul style="list-style-type: none"> <li>- Learn server-side rendering (SSR) and static site generation (SSG).</li> <li>- Build SEO-friendly apps.</li> </ul>	<ul style="list-style-type: none"> <li>- Build a blog site using Next.js.</li> </ul>
12	<b>Monorepos and Turborepo</b>	<ul style="list-style-type: none"> <li>- Understand monorepos and how to organize multiple projects.</li> <li>- Use Turborepo for performance optimization.</li> </ul>	<ul style="list-style-type: none"> <li>- Create a monorepo for shared libraries in React and Node.js.</li> </ul>
13	<b>Websockets &amp; RTC Basics</b>	<ul style="list-style-type: none"> <li>- Understand real-time communication with Websockets.</li> </ul>	<ul style="list-style-type: none"> <li>- Build a chat app with Websockets.</li> </ul>

Week	Focus Area	Goals and Skills	Resources/Tasks/Projects
14	<b>Testing Basics</b>	<ul style="list-style-type: none"> <li>- Learn RTC for video/audio communication.</li> <li>- Learn unit and integration testing.</li> <li>- Use Jest and React Testing Library.</li> <li>- Test APIs and frontend components.</li> </ul>	<ul style="list-style-type: none"> <li>- Explore RTC for a video conferencing feature.</li> </ul>
15	<b>Authentication &amp; JWT</b>	<ul style="list-style-type: none"> <li>- Understand secure user authentication.</li> <li>- Use JWT and cookies for session management.</li> </ul>	<ul style="list-style-type: none"> <li>- Write tests for your REST API and React components.</li> <li>- Add login/logout functionality to your blog platform.</li> </ul>
16	<b>Database Optimization</b>	<ul style="list-style-type: none"> <li>- Explore database optimization techniques (e.g., indexing, query optimization).</li> </ul>	<ul style="list-style-type: none"> <li>- Optimize queries for existing projects.</li> </ul>
17	<b>Advanced Backend Concepts</b>	<ul style="list-style-type: none"> <li>- Dive deeper into asynchronous programming and error handling.</li> <li>- Learn middleware chaining.</li> <li>- Implement complex backend logic.</li> </ul>	<ul style="list-style-type: none"> <li>- Refactor APIs with advanced features like rate limiting and complex queries.</li> </ul>
18	<b>Ref, Populate, and API Design</b>	<ul style="list-style-type: none"> <li>- Use ref and populate in Mongoose for relationships.</li> <li>- Learn API versioning and documentation (Swagger).</li> </ul>	<ul style="list-style-type: none"> <li>- Add relationships to your MongoDB models.</li> </ul>
19	<b>Advanced Frontend Features</b>	<ul style="list-style-type: none"> <li>- Learn dynamic form handling, animations, and accessibility features in React.</li> <li>- Explore Framer Motion for animations.</li> </ul>	<ul style="list-style-type: none"> <li>- Add form validation and animations to the task tracker.</li> </ul>

Week	Focus Area	Goals and Skills	Resources/Tasks/Projects
20	<b>Project Planning</b>	<ul style="list-style-type: none"> <li>- Plan a capstone project.</li> <li>- Define features, create high-level (HLD) and low-level designs (LLD).</li> </ul>	<ul style="list-style-type: none"> <li>- Create a project blueprint (e.g., e-commerce app or task tracker).</li> </ul>
21	<b>Capstone Backend Development</b>	<ul style="list-style-type: none"> <li>- Build the backend for your capstone project.</li> <li>- Implement CRUD APIs, authentication, and error handling.</li> </ul>	<ul style="list-style-type: none"> <li>- Set up Express.js, MongoDB, and authentication for the project.</li> </ul>
22	<b>Capstone Frontend Development</b>	<ul style="list-style-type: none"> <li>- Build the frontend for your capstone project.</li> <li>- Use React or Next.js for user interface.</li> <li>- Style the app with Tailwind CSS.</li> </ul>	<ul style="list-style-type: none"> <li>- Integrate the backend with the frontend.</li> </ul>
23	<b>Real-Time Features in Capstone</b>	<ul style="list-style-type: none"> <li>- Add real-time features using Websockets or RTC.</li> <li>- Implement live chat or real-time notifications.</li> </ul>	<ul style="list-style-type: none"> <li>- Enhance the capstone app with real-time functionality.</li> </ul>
24	<b>Testing and Deployment</b>	<ul style="list-style-type: none"> <li>- Test the app thoroughly.</li> <li>- Deploy the app to a cloud platform (e.g., Vercel, Heroku).</li> </ul>	<ul style="list-style-type: none"> <li>- Write unit and integration tests.</li> <li>- Deploy the capstone project.</li> </ul>
25	<b>Linting and Performance Optimization</b>	<ul style="list-style-type: none"> <li>- Set up linting tools (e.g., ESLint, Prettier).</li> <li>- Optimize frontend and backend performance.</li> <li>- Learn about caching strategies.</li> </ul>	<ul style="list-style-type: none"> <li>- Add ESLint and Prettier to your projects.</li> <li>- Optimize API response times and frontend load times.</li> </ul>
26	<b>Final Enhancements &amp; Portfolio</b>	<ul style="list-style-type: none"> <li>- Polish the capstone project.</li> <li>- Add the project to a portfolio site.</li> <li>- Prepare for interviews with projects and a resume.</li> </ul>	<ul style="list-style-type: none"> <li>- Create a personal portfolio using Next.js.</li> <li>- Showcase all 10 projects in your portfolio.</li> </ul>

Here's a list of **10 project ideas** aligned with the roadmap, along with a guide to building them in a tabular format:

Project Name	Description	Steps to Build	Tech Stack
Task Tracker App	A React app to track daily tasks with add, edit, and delete functionality.	<ol style="list-style-type: none"><li>1. Set up React.</li><li>2. Build a task list UI.</li><li>3. Add state management with React hooks.</li><li>4. Store tasks locally.</li></ol>	React, CSS
Bookshelf App	A MongoDB-powered app to manage a collection of books with search and CRUD operations.	<ol style="list-style-type: none"><li>1. Set up MongoDB.</li><li>2. Create Express APIs for CRUD operations.</li><li>3. Connect backend to a React frontend.</li></ol>	Node.js, Express, MongoDB, React
Blog Platform	A platform for users to post, edit, and delete blog entries. Includes JWT-based authentication.	<ol style="list-style-type: none"><li>1. Build REST APIs with Express.</li><li>2. Use MongoDB or PostgreSQL for storing blogs.</li><li>3. Add authentication.</li></ol>	Node.js, MongoDB/PostgreSQL, React
Chat App	Real-time chat app using Websockets with user authentication.	<ol style="list-style-type: none"><li>1. Set up Websockets on the backend.</li><li>2. Implement chat UI in React.</li><li>3. Add JWT authentication.</li></ol>	Node.js, Websockets, React
E-Commerce Store	A store with product listings, a cart system, and checkout functionality.	<ol style="list-style-type: none"><li>1. Design product APIs.</li><li>2. Add cart logic in React.</li><li>3. Integrate Razorpay/Stripe for payments.</li></ol>	React, Node.js, MongoDB, Payment APIs

Project Name	Description	Steps to Build	Tech Stack
Portfolio Website	A personal portfolio to showcase projects and skills.	<ol style="list-style-type: none"> <li>1. Use Next.js for SSR.</li> <li>2. Style with Tailwind CSS.</li> <li>3. Add portfolio content dynamically using JSON.</li> </ol>	Next.js, Tailwind CSS
Expense Tracker	A tool to track income and expenses with visualizations.	<ol style="list-style-type: none"> <li>1. Create React components for transactions.</li> <li>2. Store data in MongoDB.</li> <li>3. Visualize data using Chart.js.</li> </ol>	React, MongoDB, Chart.js
Online Classroom Platform	A platform for faculty to share documents, conduct live sessions, and create assignments.	<ol style="list-style-type: none"> <li>1. Build backend with Express.</li> <li>2. Implement user roles.</li> <li>3. Add WebRTC for live classes.</li> </ol>	Node.js, WebRTC, React
Video Conferencing App	A basic conferencing app using WebRTC for real-time communication.	<ol style="list-style-type: none"> <li>1. Set up WebRTC APIs.</li> <li>2. Build React frontend.</li> <li>3. Manage connections using signaling servers.</li> </ol>	WebRTC, React
Capstone E-commerce App	A fully-featured app with real-time notifications, authentication, and performance optimization.	<ol style="list-style-type: none"> <li>1. Plan HLD and LLD.</li> <li>2. Develop backend APIs.</li> <li>3. Add WebSocket-based notifications.</li> <li>4. Deploy on the cloud.</li> </ol>	Node.js, React, MongoDB, Websockets

#### Details on Building the Projects:

1. **Progressive Complexity:** Projects grow in difficulty from simple React apps (e.g., Task Tracker) to advanced, multi-featured applications (e.g., Capstone E-Commerce App).
2. **Full Stack Integration:** Emphasizes both frontend and backend skills, including databases, APIs, and real-time communication.
3. **Deployment:** Includes a deployment step (e.g., using Vercel, Heroku, or AWS) to simulate production environments.

Let me know if you need detailed guides for specific projects!

CODE WITH ABHAY

## JavaScript Learning Roadmap: Topics, Theory, and Projects

Step	Topic	Theory	Project Idea
1	Basics of JavaScript	Learn about variables, data types, operators, and expressions.	Build a <b>Simple Calculator</b> for basic arithmetic operations.
2	Control Structures	Study if, else, switch, and loops (for, while, do-while).	Create a <b>Guess the Number Game</b> where the user guesses a randomly generated number.
3	Functions	Understand function declaration, expressions, and arrow functions.	Develop a <b>Temperature Converter</b> using functions for conversions.
4	DOM Manipulation	Learn how to access and modify HTML elements with document.querySelector and document.getElementById.	Build a <b>Dynamic To-Do List</b> that lets users add, edit, and delete tasks.
5	Events and Event Listeners	Explore event types, event propagation, and how to handle events.	Create a <b>KeyPress Visualizer</b> that shows key codes when typing.

Step	Topic	Theory	Project Idea
6	Arrays	Study array methods like push, pop, filter, map, reduce, and forEach.	Create a <b>Grocery List Manager</b> with features like adding, editing, and sorting items.
7	Objects	Learn about objects, properties, methods, and how to loop through objects.	Build a <b>Student Grades Tracker</b> using objects for student data.
8	ES6 Features	Study modern features like let, const, template literals, destructuring, and the spread/rest operator.	Build a <b>Recipe Manager</b> app using ES6 features to store and edit recipes.
9	JSON and APIs	Understand JSON format and how to fetch data from APIs using fetch.	Fetch and display weather data using a <b>Weather App</b> .
10	Promises and Async/Await	Learn how to handle asynchronous operations with Promises and async/await.	Build a <b>GitHub User Finder</b> that fetches user data using the GitHub API.
11	Error Handling	Study try, catch, and finally for managing errors in code.	Create a <b>Form Validator</b> tha

Step	Topic	Theory	Project Idea
12	Classes	Explore ES6 classes, constructors, inheritance, and methods.	Develop a <b>Library App</b> with book objects and class-based structure.
13	Modules	Learn how to use import and export to organize your code into modules.	Build a <b>Multi-Page Portfolio Website</b> using JavaScript modules for navigation.
14	Browser Storage	Study localStorage, sessionStorage, and cookies for storing data in the browser.	Create a <b>Notes App</b> that saves notes in localStorage.
15	Regular Expressions (Regex)	Learn basic Regex syntax for pattern matching and validation.	Build a <b>Password Strength Checker</b> using Regex to validate input.
16	Date and Time	Understand how to work with dates and times using the Date object.	Create a <b>Countdown Timer</b> for an event with real-time updates.

Step	Topic	Theory	Project Idea
17	Closures	Study closures and how they capture variables from their surrounding scope.	Develop a <b>Stopwatch App</b> that uses closures to manage time intervals.
18	Prototypes and Inheritance	Understand JavaScript's prototype chain and inheritance.	Build a <b>Shape Drawer</b> with different shapes inheriting from a common prototype.
19	Event Loop and Async Flow	Learn how JavaScript's event loop and call stack work for asynchronous behavior.	Visualize the event loop with an <b>Interactive Event Loop Diagram</b> using animations.
20	Advanced Frameworks/Tools	Study frameworks like React or Node.js to expand your JavaScript knowledge into frontend or backend development.	Create a <b>Chat Application</b> with a real-time backend (e.g., Node.js and Socket.IO).

This roadmap covers foundational to advanced concepts, ensuring a balance between theoretical understanding and practical application. Each project complements its respective topic to strengthen hands-on skills.

## Web Development Skills

Category	Skill
Front-End Development	HTML5
	CSS3
	JavaScript (ES6+)
	React.js
	Angular
	Vue.js
	Responsive Design
	Tailwind CSS
	Bootstrap
	SASS/SCSS
	TypeScript
	Web Accessibility (WCAG)
	Cross-Browser Compatibility
	Figma/XD Integration
	DOM Manipulation
	Web Animations (CSS, GSAP, Framer Motion)
	Styled Components
	Material-UI (MUI)
	Redux Toolkit/Zustand (State Management)
	Progressive Web Apps (PWAs)

Category	Skill
Back-End Development	Node.js
	Express.js
	Django
	Flask
	Ruby on Rails
	PHP
	RESTful API Development
	GraphQL
	Authentication & Authorization (OAuth, JWT)
Database Management	Server-Side Rendering (SSR)
	SQL (MySQL, PostgreSQL)
	NoSQL (MongoDB, Firebase)
	Database Optimization
DevOps & Deployment	Cloud Databases (AWS RDS, Azure, Firestore)
	Version Control (Git/GitHub/GitLab)
	CI/CD Pipelines (Jenkins, GitHub Actions)
	Docker & Containerization
	Cloud Platforms (AWS, Azure, GCP)
	Deployment (Netlify, Vercel, Heroku)
Web Performance & Security	Webpack/Parcel/Vite
	Image Optimization

Category	Skill
	Content Delivery Networks (CDNs)
	SSL/TLS Certificates
	Security Best Practices (XSS, CSRF, SQL Injection)
	Performance Monitoring Tools (Lighthouse, GTmetrix)
<b>Additional Tools &amp; Soft Skills</b>	API Integration (REST, SOAP, GraphQL)
	Testing & Debugging (Jest, Cypress, Chrome DevTools)
	Agile Development Methodology
	Communication & Collaboration Tools (Slack, Trello)
	UX/UI Design Principles

50 tricks to identify DSA Patterns

Link: [https://drive.google.com/drive/folders/1Da\\_v5uHlvBscWcRRgMsYGq-hJ00dQL9Y](https://drive.google.com/drive/folders/1Da_v5uHlvBscWcRRgMsYGq-hJ00dQL9Y)

Company Name	DSA Problem Link	Tricks for Solving Patterns
Google	<a href="#">Google DSA Problems</a>	Focus on backtracking and dynamic programming.
Microsoft	<a href="#">Microsoft DSA Problems</a>	Practice binary search, greedy algorithms.
Amazon	<a href="#">Amazon DSA Problems</a>	Work on sliding window, heap, and DFS/BFS.
Facebook	<a href="#">Facebook DSA Problems</a>	Master recursion, graphs, and bit manipulation.
Apple	<a href="#">Apple DSA Problems</a>	Prioritize dynamic programming and divide and conquer.

Company Name	DSA Problem Link	Tricks for Solving Patterns
Adobe	<a href="#">Adobe DSA Problems</a>	Practice sorting and searching techniques.
Goldman Sachs	<a href="#">Goldman Sachs DSA Problems</a>	Focus on arrays, hashing, and string manipulation.
Uber	<a href="#">Uber DSA Problems</a>	Work on graphs, BFS/DFS, and Dijkstra's algorithm.
LinkedIn	<a href="#">LinkedIn DSA Problems</a>	Focus on two-pointer and sliding window techniques.
Netflix	<a href="#">Netflix DSA Problems</a>	Prioritize dynamic programming and DP on trees.
Twitter	<a href="#">Twitter DSA Problems</a>	Work on greedy algorithms and interval problems.
Dropbox	<a href="#">Dropbox DSA Problems</a>	Master recursion and binary search on sorted arrays.
Airbnb	<a href="#">Airbnb DSA Problems</a>	Practice graph traversal and backtracking.
Salesforce	<a href="#">Salesforce DSA Problems</a>	Work on greedy algorithms and dynamic programming.
Oracle	<a href="#">Oracle DSA Problems</a>	Focus on matrix traversal and dynamic programming.
PayPal	<a href="#">PayPal DSA Problems</a>	Prioritize binary search and sorting problems.
Walmart	<a href="#">Walmart DSA Problems</a>	Focus on hashing, prefix sums, and arrays.
Expedia	<a href="#">Expedia DSA Problems</a>	Practice stack-based problems and recursion.
Snap	<a href="#">Snap DSA Problems</a>	Focus on graphs and dynamic programming.
Yahoo	<a href="#">Yahoo DSA Problems</a>	Work on linked lists and recursion.
DoorDash	<a href="#">DoorDash DSA Problems</a>	Master binary trees and backtracking.

Company Name	DSA Problem Link	Tricks for Solving Patterns
Stripe	<a href="#">Stripe DSA Problems</a>	Practice greedy algorithms and string manipulation.
Lyft	<a href="#">Lyft DSA Problems</a>	Focus on two-pointer and sliding window techniques.
Intuit	<a href="#">Intuit DSA Problems</a>	Work on backtracking and dynamic programming.
IBM	<a href="#">IBM DSA Problems</a>	Master dynamic programming and recursion problems.
Atlassian	<a href="#">Atlassian DSA Problems</a>	Focus on graph traversal and dynamic programming.
Reddit	<a href="#">Reddit DSA Problems</a>	Work on hashing and bit manipulation.
Pinterest	<a href="#">Pinterest DSA Problems</a>	Master recursion and divide and conquer techniques.
Spotify	<a href="#">Spotify DSA Problems</a>	Focus on sorting, searching, and heaps.
Bloomberg	<a href="#">Bloomberg DSA Problems</a>	Work on arrays, dynamic programming, and graphs.
Cisco	<a href="#">Cisco DSA Problems</a>	Focus on linked lists and dynamic programming.
ByteDance	<a href="#">ByteDance DSA Problems</a>	Master sorting algorithms and binary search.
Tesla	<a href="#">Tesla DSA Problems</a>	Work on graph traversal and dynamic programming.
TikTok	<a href="#">TikTok DSA Problems</a>	Prioritize dynamic programming and recursion.
Nvidia	<a href="#">Nvidia DSA Problems</a>	Practice bit manipulation and backtracking.

## Most Common Resume Projects and their Advanced Version

Sno	Project	Basic Version	Advanced Version	Resource Link
1	Tic Tac Toe Game	Basic Tic-Tac-Toe Game	⭐ Multiplayer Tic-Tac-Toe using WebSockets	<a href="#">WebSockets Tutorial</a>
2	Weather Application	Simple Weather App	⭐ Weather Bot for Discord with Alerts	<a href="#">Discord.js Guide</a>
3	Ecommerce Website	Basic Ecommerce Website	⭐ AI-Driven Chrome Extension for Price Comparisons Using Web Scraping	<a href="#">Puppeteer Docs</a>
4	Crypto Tracker	Static Crypto Tracker	⭐ AI-Powered Crypto Trading Bot	<a href="#">Binance API</a>
5	Portfolio Website	Static Personal Portfolio Website	⭐ Interactive Portfolio with Real-Time Analytics & AI Bot	<a href="#">ReactJS</a>
6	Calculator	Simple Calculator	⭐ Advanced Financial Calculator with Tax, Loan, and Investment Features	<a href="#">MDN Calculator Guide</a>
7	To-Do List	Basic To-Do App	⭐ Collaborative To-Do App with Task Dependencies and Deadlines	<a href="#">Firebase Docs</a>
8	Blog Platform	Simple Blog Platform	⭐ Dynamic Blog Platform with NLP-based Content Recommendations and Summaries	<a href="#">TensorFlow.js</a>
9	Social Media App	Basic Social Media Platform	⭐ Decentralized Social Media App with User-Curated Content Streams	<a href="#">Web3.js</a>
10	Language Translator	Basic Language Translator	⭐ AI-Powered Real-Time Voice Translator with Sentiment Analysis	<a href="#">Google Cloud Translate</a>

Sno	Project	Basic Version	Advanced Version	Resource Link
11	Task Management Tool	Basic Task Manager	⭐ AI-Based Task Manager with Productivity Insights and Notifications	<a href="#">Microsoft AI API</a>
12	Fitness Tracker	Simple Fitness Tracker	⭐ AI-Powered Fitness Tracker with Workout Recommendations and Nutritional Analysis	<a href="#">Nutritionix API</a>
13	Chatbot	Basic Chatbot	⭐ AI Chatbot with Contextual Memory and Personalized Responses	<a href="#">Dialogflow</a>
14	Music Streaming App	Simple Music Streaming App	⭐ AI-Based Music Recommendation Platform with Mood Detection	<a href="#">Spotify API</a>
15	Recipe Finder	Simple Recipe Search	⭐ AI-Powered Recipe Finder with Dietary Preferences and Nutritional Analysis	<a href="#">Spoonacular API</a>
16	Quiz App	Basic Quiz Application	⭐ Gamified Quiz App with Leaderboards and Interactive Feedback	<a href="#">Open Trivia Database</a>
17	Video Streaming App	Simple Video Streaming App	⭐ AI-Based Video Summarization and Interactive Viewing Experience	<a href="#">Mux API</a>
18	Stock Market Tracker	Basic Stock Market Tracking App	⭐ Real-Time Stock Market Dashboard with Predictive Analytics	<a href="#">Alpha Vantage</a>
19	Virtual Classroom	Basic Virtual Classroom App	⭐ Interactive Classroom Platform with AI-Powered Participation Insights and Real-Time Feedback	<a href="#">BigBlueButton</a>

## 3-Month Logic-Building & Problem-Solving Roadmap

Week	Focus Area	Daily Breakdown	Checkpoints
Week 1	Foundation: Basics of Programming	<p><b>Day 1-2:</b> Learn variables, data types, loops (for, while).</p> <p><b>Day 3-4:</b> Conditionals, functions.</p> <p><b>Day 5-6:</b> Arrays &amp; Strings basics.</p> <p><b>Day 7:</b> Solve 10 simple pattern-building questions (stars, triangles).</p>	<input checked="" type="checkbox"/> Understand basic syntax and concepts. <input checked="" type="checkbox"/> Solve <b>10 pattern-building problems</b> .
Week 2	Introduction to Problem Solving	<p><b>Day 1-2:</b> Learn dry-run and pseudocode.</p> <p><b>Day 3-5:</b> Solve <b>10 simple DSA problems</b> (easy level, e.g., reverse array, Fibonacci).</p> <p><b>Day 6-7:</b> Build <b>Mini Project 1: Calculator App</b>.</p>	<input checked="" type="checkbox"/> Solve 10 DSA problems. <input checked="" type="checkbox"/> Complete <b>Mini Project 1: Calculator App</b> .
Week 3	Level Up: Arrays & Logic Thinking	<p><b>Day 1-2:</b> Advanced array techniques (sliding window, prefix sum).</p> <p><b>Day 3-6:</b> Solve <b>15 array-based problems</b> (medium level).</p> <p><b>Day 7:</b> Build <b>Mini Project 2: Tic-Tac-Toe Game</b>.</p>	<input checked="" type="checkbox"/> Solve 25 total DSA problems (15 new). <input checked="" type="checkbox"/> Complete <b>Mini Project 2: Tic-Tac-Toe Game</b> .
Week 4	Strings & Problem-Solving Practice	<p><b>Day 1-2:</b> String manipulation (reversal, palindromes, substrings).</p> <p><b>Day 3-5:</b> Solve <b>15 string-based problems</b> (easy-medium).</p> <p><b>Day 6-7:</b> Build <b>Mini Project 3: Text Manipulation Tool</b> (e.g., Uppercase, Reverse).</p>	<input checked="" type="checkbox"/> Solve 40 total DSA problems (15 new). <input checked="" type="checkbox"/> Complete <b>Mini Project 3: Text Tool</b> .
Week 5	Recursion & Logic Expansion	<p><b>Day 1-2:</b> Learn recursion basics (factorial, Fibonacci).</p> <p><b>Day 3-5:</b> Solve <b>10 recursion-based problems</b> (medium level).</p> <p><b>Day 6-7:</b> Build <b>Mini Project 4: Recursive Maze Solver</b>.</p>	<input checked="" type="checkbox"/> Solve 50 total DSA problems (10 new). <input checked="" type="checkbox"/> Complete <b>Mini Project 4: Recursive Maze Solver</b> .
Week 6	Data Structures: Stacks & Queues	<p><b>Day 1-2:</b> Learn stacks and queues basics.</p>	<input checked="" type="checkbox"/> Solve 65 total DSA problems (15 new).

Week	Focus Area	Daily Breakdown	Checkpoints
Week 7	Dynamic Programming Introduction	<p><b>Day 3-6:</b> Solve <b>15 problems</b> (balanced parentheses, queue reversal).</p> <p><b>Day 7:</b> Work on <b>Mini Project 5: Browser History Tracker</b> (using stack).</p>	<input checked="" type="checkbox"/> Complete <b>Mini Project 5: Browser History Tracker.</b>
Week 8	Advanced Problem Solving (Graph)	<p><b>Day 1-3:</b> Learn DP basics (knapsack, Fibonacci with memoization).</p> <p><b>Day 4-6:</b> Solve <b>10 DP problems</b> (easy-medium).</p> <p><b>Day 7:</b> Revise all past concepts/projects.</p>	<input checked="" type="checkbox"/> Solve 75 total DSA problems (10 new). <input checked="" type="checkbox"/> Master basic DP problems.
Week 9	Advanced DSA (Sorting/Greedy)	<p><b>Day 1-2:</b> Learn graph representation (adjacency list/matrix).</p> <p><b>Day 3-5:</b> Solve <b>10 graph-based problems</b> (BFS/DFS).</p> <p><b>Day 6-7:</b> Build a <b>Mini Project: Path Finder Visualizer</b>.</p>	<input checked="" type="checkbox"/> Solve 85 total DSA problems (10 new). <input checked="" type="checkbox"/> Complete Graph-Based Mini Project.
Week 10-11	Integration: Complex Projects	<p><b>Day 1-2:</b> Learn sorting algorithms (merge sort, quicksort).</p> <p><b>Day 3-5:</b> Solve <b>15 problems</b> on sorting/greedy (e.g., activity selection, job scheduling).</p> <p><b>Day 1-7:</b> Brainstorm and build <b>Project 1: Expense Tracker with Charts</b>.</p> <p><b>Next 7 days:</b> Build <b>Project 2: Multiplayer Rock-Paper-Scissors Game</b> (WebSockets, if possible).</p>	<input checked="" type="checkbox"/> Solve 100 DSA problems (15 new).  <input checked="" type="checkbox"/> Integrate past knowledge into real-world projects. <input checked="" type="checkbox"/> Master real-world application-building.
Week 12	Final Touches and Mock Practice	<p><b>Day 1-3:</b> Revise all concepts learned.</p> <p><b>Day 4-6:</b> Solve 10 problems from past mistakes or blindspots.</p> <p><b>Day 7:</b> Build a final project of</p>	<input checked="" type="checkbox"/> Complete final project. <input checked="" type="checkbox"/> Feel confident in solving beginner-intermediate DSA problems.

Week	Focus Area	Daily Breakdown	Checkpoints
Your weekly challenge will involve solving a DSA problem of your choice integrating at least one complex DSA concept.			
 <b>How to Think of Logic</b>			
<ol style="list-style-type: none"> <li><b>Break Down the Problem:</b> Read the question twice. Identify inputs, outputs, and constraints.</li> <li><b>Start with Examples:</b> Create test cases manually and simulate the solution step-by-step.</li> <li><b>Write Pseudocode:</b> Draft a high-level plan before coding.</li> <li><b>Ask “Why?” at Every Step:</b> Understand each operation; don’t memorize solutions.</li> <li><b>Visualize:</b> Use diagrams or dry-run tables to debug.</li> <li><b>Optimize Gradually:</b> Start with brute force; iterate to optimize for efficiency.</li> </ol>			
 <b>100 DSA Questions for Logic Building</b>			
Category	Question Name	Platform	Link
Basics & Warm-Up	Print a pattern of stars (triangle, pyramid)	GeeksforGeeks	<a href="#">Link</a>
	Reverse a number	GeeksforGeeks	<a href="#">Link</a>
	Check if a number is palindrome	GeeksforGeeks	<a href="#">Link</a>
	Count digits in a number	GeeksforGeeks	<a href="#">Link</a>
	Find factorial of a number	HackerRank	<a href="#">Link</a>
Arrays	Reverse an array	LeetCode	<a href="#">Link</a>
	Find the maximum and minimum of an array	GeeksforGeeks	<a href="#">Link</a>
	Rotate an array by K steps	LeetCode	<a href="#">Link</a>
	Move all zeroes to the end	LeetCode	<a href="#">Link</a>
Strings	Kadane's Algorithm (Maximum Subarray Sum)	LeetCode	<a href="#">Link</a>
	Reverse a string	LeetCode	<a href="#">Link</a>

Category	Question Name	Platform	Link
Recursion	Check if two strings are anagrams	LeetCode	<a href="#">Link</a>
	Longest Common Prefix	LeetCode	<a href="#">Link</a>
	Check if a string is a palindrome	LeetCode	<a href="#">Link</a>
	Count and say	LeetCode	<a href="#">Link</a>
	Fibonacci series using recursion	GeeksforGeeks	<a href="#">Link</a>
Sorting	Tower of Hanoi	GeeksforGeeks	<a href="#">Link</a>
	Factorial using recursion	LeetCode	<a href="#">Link</a>
	Reverse a linked list using recursion	LeetCode	<a href="#">Link</a>
	Permutations of a string	GeeksforGeeks	<a href="#">Link</a>
	Bubble sort	GeeksforGeeks	<a href="#">Link</a>
Searching	Selection sort	GeeksforGeeks	<a href="#">Link</a>
	Merge sort	GeeksforGeeks	<a href="#">Link</a>
	Quick sort	GeeksforGeeks	<a href="#">Link</a>
	Insertion sort	GeeksforGeeks	<a href="#">Link</a>
	Binary search	LeetCode	<a href="#">Link</a>
Linked List	Linear search	GeeksforGeeks	<a href="#">Link</a>
	Search in a rotated sorted array	LeetCode	<a href="#">Link</a>
	First and last position in a sorted array	LeetCode	<a href="#">Link</a>
	Square root of a number (using binary search)	LeetCode	<a href="#">Link</a>
	Reverse a linked list	LeetCode	<a href="#">Link</a>

Category	Question Name	Platform	Link
<b>Stacks &amp; Queues</b>	Detect a cycle in a linked list	LeetCode	<a href="#">Link</a>
	Merge two sorted linked lists	LeetCode	<a href="#">Link</a>
	Remove Nth node from the end	LeetCode	<a href="#">Link</a>
	Find the middle of a linked list	LeetCode	<a href="#">Link</a>
	Implement a stack using arrays	LeetCode	<a href="#">Link</a>
<b>Dynamic Programming</b>	Evaluate postfix expression	GeeksforGeeks	<a href="#">Link</a>
	Balanced parentheses	LeetCode	<a href="#">Link</a>
	Next greater element	LeetCode	<a href="#">Link</a>
	Implement a queue using stacks	LeetCode	<a href="#">Link</a>
	0/1 Knapsack problem	GeeksforGeeks	<a href="#">Link</a>
<b>Graphs</b>	Fibonacci using dynamic programming	LeetCode	<a href="#">Link</a>
	Longest common subsequence	LeetCode	<a href="#">Link</a>
	Longest increasing subsequence	LeetCode	<a href="#">Link</a>
	Minimum steps to reach the end	LeetCode	<a href="#">Link</a>
	BFS traversal	GeeksforGeeks	<a href="#">Link</a>
	DFS traversal	GeeksforGeeks	<a href="#">Link</a>
	Detect cycle in an undirected graph	GeeksforGeeks	<a href="#">Link</a>
	Shortest path in a graph (Dijkstra's)	GeeksforGeeks	<a href="#">Link</a>
	Topological sort	GeeksforGeeks	<a href="#">Link</a>

<b>Project Overview</b>	<ul style="list-style-type: none"><li>- Can you give an overview of your recent project?</li><li>- What was the purpose of the project, and how did it solve the problem?</li><li>- What technologies did you use, and why?</li></ul>
<b>Challenges &amp; Solutions</b>	<ul style="list-style-type: none"><li>- What were the biggest challenges you faced during the project?</li><li>- How did you handle performance bottlenecks or scaling issues?</li><li>- Describe a time when something went wrong. How did you resolve it?</li></ul>
<b>Technical Stack</b>	<ul style="list-style-type: none"><li>- Why did you choose this particular stack for your project?</li><li>- What design patterns or architectural decisions did you follow?</li><li>- How did you ensure security in your application?</li></ul>
<b>Team Collaboration</b>	<ul style="list-style-type: none"><li>- Did you work in a team? If so, how did you manage code collaboration?</li><li>- How did you handle merging conflicts and version control?</li><li>- How did you communicate with team members about changes or blockers?</li></ul>
<b>Scalability &amp; Optimization</b>	<ul style="list-style-type: none"><li>- How did you design your project to be scalable?</li><li>- What kind of optimizations did you implement to improve performance?</li><li>- How did you handle data-intensive operations or large datasets?</li></ul>
<b>Testing &amp; Quality</b>	<ul style="list-style-type: none"><li>- How did you test your project?</li><li>- What kind of testing framework or methodology did you use (unit, integration, e2e)?</li><li>- How did you manage deployment and continuous integration?</li></ul>

<b>Innovative Features</b>	<ul style="list-style-type: none"><li>- Did you implement any innovative or unique features?</li><li>- How did you incorporate AI/ML, blockchain, or other cutting-edge tech in your project?</li></ul>
<b>Project Outcomes</b>	<ul style="list-style-type: none"><li>- What was the final outcome or impact of your project?</li><li>- How did users or stakeholders respond to your solution?</li><li>- Can you provide any metrics that indicate the success of your project (e.g., performance gains, user adoption)?</li></ul>
<b>Future Improvements</b>	<ul style="list-style-type: none"><li>- If you could revisit this project, what improvements or changes would you make?</li><li>- What additional features do you plan to add in the future?</li></ul>

CODE WITH AI

Here are some resources and roadmaps to help you learn React, Python, Generative AI (Gen AI), Retrieval-Augmented Generation (RAG), and Augmented Reality (AR):

## 1. React

- **Roadmap:**
  - [React Developer Roadmap](#)
  - [React Learning Path - freeCodeCamp](#)
- **Courses & Tutorials:**
  - [React – The Complete Guide \(Udemy\)](#)
  - [Frontend Masters React Learning Path](#)

## 2. Python

- **Roadmap:**
  - [Python Developer Roadmap](#)
- **Courses & Tutorials:**
  - [Python for Everybody \(Coursera\)](#)

## 3. Generative AI (Gen AI)

- **Introduction Resources:**
  - [Google's Generative AI Learning Path](#)
  - [OpenAI Resources](#)
- **Roadmap:**
  - Generative AI Roadmap (GitHub)
- **Courses & Tutorials:**
  - [Generative AI with Large Language Models](#)

## 4. Retrieval-Augmented Generation (RAG)

- **Overview and Learning Resources:**
  - [RAG Overview on GitHub](#)
  - How RAG Works (Article)
- **Courses & Tutorials:**
  - [Implementing RAG with OpenAI API \(YouTube\)](#)

## 5. Augmented Reality (AR)

- **Official Documentation:**
  - [ARCore Documentation \(Google\)](#)

- [ARKit Documentation \(Apple\)](#)
- **Roadmap:**
  - [AR Developer Roadmap](#)
- **Courses & Tutorials:**
  - [Unity AR Tutorial](#)
  - [Coursera - AR Development with Unity](#)

These resources provide comprehensive learning paths from beginner to advanced levels.

### Night Owl Algorithm

Time	Activity
8:30 AM	Wake up and freshen up
9:00 AM - 1:00 PM	Internship work / Study
1:00 PM - 2:00 PM	Lunch break
2:00 PM - 5:00 PM	Project work / Study
5:30 PM - 8:00 PM	Physical Exercise
8:00 PM - 9:00 PM	Dinner
9:00 PM - 12:00 AM	Study / DSA Practice
12:30 AM - 1:30 AM	Self-learning
1:30 AM	Wind down and sleep

### Weekends Algorithm

Time	Activity
6:30 AM	Wake up and freshen up
7:00 AM - 9:00 AM	Physical Exercise
9:00 AM - 12:00 PM	Self-learning
12:00 PM - 1:00 PM	Lunch break
1:00 PM - 4:00 PM	DSA Practice
4:00 PM - 6:00 PM	Rest / Relaxation
6:00 PM - 9:00 PM	Project work / Hackathon prep
9:00 PM - 11:00 PM	Internship work / Leisure time
11:00 PM	Wind down and relax

### Prioritizing Algorithm

Time	Activity
6:00 AM	Start the day by prioritizing tasks
7:00 AM - 12:00 PM	Focus on highest priority task
12:00 PM - 1:00 PM	Lunch break
1:00 PM - 5:00 PM	Dedicated block for internships
5:00 PM - 7:00 PM	Physical exercise / Free time
7:00 PM - 9:00 PM	Study session / DSA Practice
9:00 PM - 11:00 PM	Project work / Hackathon prep

<b>Company Name</b>	<b>DSA Problem Link</b>	<b>Tricks for Solving Patterns</b>
Google	<a href="#">Google DSA Problems</a>	Focus on backtracking and dynamic programming.
Microsoft	<a href="#">Microsoft DSA Problems</a>	Practice binary search, greedy algorithms.
Amazon	<a href="#">Amazon DSA Problems</a>	Work on sliding window, heap, and DFS/BFS.
Facebook	<a href="#">Facebook DSA Problems</a>	Master recursion, graphs, and bit manipulation.
Apple	<a href="#">Apple DSA Problems</a>	Prioritize dynamic programming and divide and conquer.
Adobe	<a href="#">Adobe DSA Problems</a>	Practice sorting and searching techniques.
Goldman Sachs	<a href="#">Goldman Sachs DSA Problems</a>	Work on dynamic programming and number theory.
Uber	<a href="#">Uber DSA Problems</a>	Master graph traversal, greedy methods.
LinkedIn	<a href="#">LinkedIn DSA Problems</a>	Work on graph algorithms and hashmaps.
Netflix	<a href="#">Netflix DSA Problems</a>	Focus on greedy algorithms and dynamic programming.
Twitter	<a href="#">Twitter DSA Problems</a>	Master sliding window and prefix sum techniques.
Dropbox	<a href="#">Dropbox DSA Problems</a>	Work on recursion, memoization, and hashmaps.
Airbnb	<a href="#">Airbnb DSA Problems</a>	Focus on backtracking and greedy algorithms.
Salesforce	<a href="#">Salesforce DSA Problems</a>	Prioritize heap, greedy, and two-pointer techniques.
Oracle	<a href="#">Oracle DSA Problems</a>	Master string manipulation and binary trees.
PayPal	<a href="#">PayPal DSA Problems</a>	Focus on recursion and dynamic programming.

<b>Company Name</b>	<b>DSA Problem Link</b>	<b>Tricks for Solving Patterns</b>
Walmart	<a href="#">Walmart DSA Problems</a>	Practice array manipulation and sorting algorithms.
Expedia	<a href="#">Expedia DSA Problems</a>	Focus on DFS/BFS, recursion, and backtracking.
Snap	<a href="#">Snap DSA Problems</a>	Practice two-pointer and graph traversal methods.
Yahoo	<a href="#">Yahoo DSA Problems</a>	Master dynamic programming and recursion techniques.
DoorDash	<a href="#">DoorDash DSA Problems</a>	Focus on sliding window and interval problems.
Stripe	<a href="#">Stripe DSA Problems</a>	Practice dynamic programming and number theory.
Lyft	<a href="#">Lyft DSA Problems</a>	Focus on recursion and hashmaps.
Intuit	<a href="#">Intuit DSA Problems</a>	Master greedy algorithms and dynamic programming.
IBM	<a href="#">IBM DSA Problems</a>	Focus on graph traversal and recursion techniques.
Atlassian	<a href="#">Atlassian DSA Problems</a>	Practice dynamic programming and sliding window.
Reddit	<a href="#">Reddit DSA Problems</a>	Focus on graph traversal and sorting algorithms.
Pinterest	<a href="#">Pinterest DSA Problems</a>	Practice recursion and backtracking.
Spotify	<a href="#">Spotify DSA Problems</a>	Master sliding window and string manipulation.
Bloomberg	<a href="#">Bloomberg DSA Problems</a>	Work on greedy algorithms and dynamic programming.
Cisco	<a href="#">Cisco DSA Problems</a>	Focus on recursion and divide and conquer.
